PROFESSIONAL SUMMARY

Software engineer with expertise in full-stack development, cloud computing, API engineering, and scalable data solutions. Passionate about building efficient microservices, real-time data pipelines, and secure cloud-based architectures. Experienced in Java, Python, Node.js, Spring Boot, AWS/GCP, and event-driven architectures. Adept at designing APIs and optimizing system performance.

SKILLS

- Programming: Java, Python, JavaScript, TypeScript
- Frameworks & APIs: Spring Boot, Node.js, Express, REST, GraphQL
- Cloud : AWS, GCP
- Databases & Messaging: PostgreSQL, MongoDB, Redis, NoSQL, Kafka, Pulsar, RabbitMQ
- Data Processing & Pipelines: Spark, Apache Airflow

WORK HISTORY

Software Engineer, 01/2024 - Current

Perksway – Detroit, MI

- Developed and optimized RESTful APIs using Spring Boot reducing response latency by 20%.
- Integrated Kafka for real-time event streaming, improving system scalability.
- Designed CI/CD pipelines with GitHub Actions & Jenkins, reducing deployment time by 40%.
- Developed secure authentication & authorization mechanisms to enhance user data security.

Data Science & Engineering Intern, 05/2023 - 08/2023

Ford Motor – Dearborn, MI

- Developed predictive models to optimize vehicle battery performance, reducing overcharging by 8%.
- Built data ingestion pipelines using Kafka & Spark Streaming, handling real-time vehicle telemetry data.
- Designed interactive dashboards in Looker Studio to enable fleet analytics & decision-making.

Area Manager of Operations, 07/2024 - Current

Amazon – Detroit, MI

- Resolved IT challenges, improving team productivity and operational workflows by 10%.
- Monitored system performance and ensured SLA compliance in high-pressure environments.
- Created knowledge base documentation, increasing troubleshooting efficiency by 20%.

EDUCATION

Bachelor of Science: Information Technology, 12/2024

Wayne State University - Detroit, MI

- Dean's List (2021, 2022, 2023, 2024)
- GPA: 3.92

PROJECT

Website Fingerprinting Detection

- Built an ML pipeline to detect encrypted network traffic patterns, achieving high classification accuracy.
- Implemented feature extraction and evaluation techniques to improve detection efficiency.

Incident Response Automation

- Developed PowerShell and Python scripts for automating incident detection and resolution, reducing response time by 30%.

CERTIFICATIONS

- AWS Certified Solutions Architect Associate
- TestOut Network Pro
