PROFESSIONAL SUMMARY

Results-driven Software Engineer with hands-on experience in backend microservices, cloud computing, and CI/CD automation. Proven ability to design scalable REST APIs, build event-driven systems with Kafka, and deploy production-ready services on AWS and GCP. Skilled in Java, Kotlin, Python, and Android development, with a strong focus on distributed systems, performance optimization, and cloud-native solutions. Passionate about solving complex system challenges and delivering reliable, high-performance software.

WORK HISTORY

Software Engineer – Backend (GOMS Team)

Ford Motor Company | April 2025 – Present

- Designed scalable microservices for vehicle order search using Kotlin, Spring Boot, Kafka, and Hazelcast.
- Built SQL-backed and BigQuery-based search utilities, enabling low-latency queries across relational and cloud-scale datasets.
- Integrated Google BigQuery with Spring to support complex, large-scale data searches from distributed cloud storage.
- Practicing Test-Driven Development (TDD) and maintaining CI/CD pipelines using Jenkins and GitHub Actions in a hybrid agile environment.

Software Engineer(CO-Owner)

Perksway | Jan 2024 – Present

- Built RESTful APIs using Spring Boot, enabling seamless integration between user, order, and delivery services.
- Integrated Kafka to decouple services and support real-time event-driven architecture.
- Designed CI/CD pipelines with GitHub Actions and Jenkins, reducing deployment friction and rollback risk.
- Applied secure authentication/authorization with Spring Security, JWT, and role-based access control.

Data Science & Engineering Intern

Ford Motor Company | May 2023 – Aug 2023

- Developed real-time data pipelines using Apache Kafka and Spark Streaming for connected vehicle telemetry.
- Built machine learning models to predict charging inefficiencies, reducing overcharging by 8% across test fleets.
- Created interactive dashboards using Looker Studio to visualize EV fleet analytics and support engineering decisions.
- Collaborated with Android teams to troubleshoot and analyze infotainment system logs for performance issues.

EDUCATION

Bachelor of Science: Information Technology, 12/2024

Wayne State University - Detroit, MI

- Dean's List (2021, 2022, 2023, 2024)
- GPA: 3.92

SKILLS

- **Programming:** Java, Python, JavaScript, Kotlin
- **Cloud Platforms:** AWS, GCP
- **Android & Mobile Development:** Android Studio, Gradle, APK Deployment (Java), Maven
- **App Deployment & CI/CD:** Jenkins, GitHub Actions, Docker, Kubernetes
- **Databases & Messaging:** PostgreSQL, MongoDB, Kafka, RabbitMQ
- **Data Processing:** Apache Spark, Airflow, Looker Studio

CERTIFICATIONS

- AWS Certified Solutions Architect Associate
- TestOut Network Pro

PROJECTS

Website Fingerprinting Detection

- Developed an end-to-end machine learning pipeline to detect encrypted network traffic patterns with high classification accuracy.
- Designed and implemented advanced feature extraction and evaluation methods to enhance detection performance and efficiency.
